

Drainage System Maintenance Service Contractors

It is wise to obtain at least three bids. This is a competitive field and it is often possible to realize substantial savings by soliciting competitive bids. *When requesting service from a contractor, provide the contractor with a copy of the attached inspection report and site map.* The information it contains will save time and make it easier for the contractor to prepare an accurate bid estimate. The contractors are aware that they can contact Seattle Public Utilities if they require a clarification of the report. Please notify the Seattle Public Utilities inspector when the work has been completed, so that if the contractor's work is deficient, this fact can be discovered during the re-inspection and before the contractor is paid. If the maintenance work has been completed correctly, the inspector will send a sign-off letter to you, noting that your stormwater detention system is in compliance with city standards for maintenance.

Seattle Public Utilities makes no recommendation whatsoever regarding any private contractor who performs drainage system maintenance. The companies listed below can be found in the Yellow Pages phone book, under Sewer/Drainage Contractors. Most maintain, clean and install components, and install oil absorbent booms and cushions. This is not an all-inclusive list of contractors that can provide this type of service.

A-1 Services, Inc.
